

### Differential inputs - we have them!

In many test setups, **differential inputs** are needed for measurements. Our "59" series digitizers provide them, as well as offering **sampling rates from 5 kS/s to 125 MS/s**. You can have **4 true differential channels (8 jacks)** on a single PCIe digitizer card, or make a system with up to **64 true differential channels** in one PC! And for stand-alone solutions, our **Ethernet/LXI netboxes** offer up to **24 true differential channels** in a single instrument.
